## PUBLIC NOTICE

### CLEAN HARBORS EL DORADO, LLC – EL DORADO, ARKANSAS

Clean Harbors El Dorado, LLC (Clean Harbors) operates a hazardous waste incineration system at its El Dorado, Arkansas, facility. The general commercial function of the El Dorado facility is to thermally treat (incinerate) hazardous and non-regulated materials and render the residue ash acceptable for disposal at regulated landfills.

Clean Harbors' hazardous waste incineration system, is subject to the National Emission Standards for Hazardous Air Pollutants (NESHAPS) for Hazardous Waste Combustors (HWCs) codified in Title 40 Code of Federal Regulations (CFR) Part 62 Subpart EEE. Known as Maximum Achievable Control Technology (MACT) standards, the HWC NESHAP set more stringent emissions limit for Phase I incinerators that burn hazardous waste. As required by the HWC NESHAP, impacted facilities must conduct a comprehensive performance test (CPT) to demonstrate compliance with the emission standards one year after start up. The facility must make the site-specific comprehensive performance test and the continuous monitoring systems performance evaluation test plans that describe the testing event available to the public for review. This public notice is also being mailed to all persons listed on the Facility Mailing list for the Clean Harbors EL Dorado facility and representatives of appropriate state and local government units.

The test is scheduled to begin on January 22, 2018 and should be completed by January 26, 2018. A copy of the referenced test plan is available for viewing 8:00 am until 5:00 pm, Monday through Friday beginning November 22, 2017 at:

Clean Harbors El Dorado, LLC  
309 American Circle  
El Dorado, AR  
870-863-7173
